02 November 2018 07:...

Dear all,

Probably this is a more suitable kind of official letter.

Please let me know if this is in the good direction.

Best regards,

Salvador Carrillo  
Universidad Iberoamericana  
Mexico city

Subject: RE: Collaboration IBERIO MEX

Nov 2nd !

## Example of IBERO letter:

Dear all,

Probably this is a more suitable kind of official letter.

Please let me know if this is in the good direction.

Best regards,

Salvador Carrillo  
Universidad Iberoamericana  
Mexico city

I was at CERN but:

- ✓ This exercise needs to be done by our group with out Mexico intervention!
- We need to proof (also) that sending from 904/CERN works!

Mexico city, August 31th 2018

Dear Gabriella Pugliese,  
CMS RPC Project Manager

I wil like to express my commitment as a Team Leader from Universidad Iberoamericana to fully participate with the CMS RPC subsystem group in the Phase-2 Upgrade building 72 RPC detectors plus spares in Mexico. We will follow all the specifications that the RPC sybssystem group will establish in order to have a suitable performance detector for the High Luminosity LHC.

This implies having at least one dedicated laboratory to performe all the required test like, gas leak, electrical test, chamber performance ( efficiency, cluster size, streamer probability), high voltage scans, etc.

This also requires to receive material from CERN, and to send the assembled chambers or other related materials from Mexico to CERN (Geneva, Switzerland) using our own institution importation or exportation service, or using a third party service.

Please do not hesitate to contact me at your convenience for any other information.

Sincerely,

Dr. Salvador Carrillo Moreno  
CMS Universidad Iberoamericana Team Leader
