Dear Amr,

I do not see the transaction yet in the account so I will send the invoice only after that, as am not sure about the final cost. Anyway, main thing is that the shipment arrived.

Best regards,  
Kirsti

Hello Amr & Nour

The packet left 904 on Wednesday at 10am  
Then it was picked up yesterday by DHL at 2pm and is already in DHL Bahrain after transiting through Germany !  
It should be delivered Sunday.

This is really not necessary. I hope the price tag of 568CHF is not a reflection of this.

Cheers

Ian

PS the dates for departure and arrival are not visible on the final EDH. They should have been spaced out by at least 2 weeks on the original we put 4 weeks.....

Colleagues

I have reestablished access to the edh but it appears that nobody can sign even with help from IT unless it is taken up to a "third level developer".

Who will clone, so having their name on it ?

I can do it if nobody is bothered if my name appears as creator (of the document only that is !)

Ian

Hi,

I see that the request in EDH is now cancelled:  
<https://edh.cern.ch/Document/SupplyChain/SHIP/10473336>

I need the new number of the document though, and indeed I think the Blokhead should be Bulkhead :)

Kirsti

Colleagues

Apart from a few spelling mistakes in the EDH it agrees with the Pro Forma request

I notice that the Mylar sheets and the brass unions have the same HS codes , this is a little blatant.

Cheers

Ian

Item 1            spelling of coating  
item 7            spelling of Bulkhead

Dear Colleagues

I am going through the latest documents to check for agreement between EDH and proforma request from Kirsti.

Does the proforma request, usually made out based on the EDH contents list replace the collaboration certificate/declaration.

What of the dual use required by SECO. I saw a version from 2018 that I had signed but a more recent one would be better.

I see no attachments in the EDH No. 10476413 made out by Nour.

Cheers

Ian
